Authority SAAS Link Placements

Editorial links from established SaaS and technology sites - the only package here built for rankings, not visibility.

WHAT YOU GET

- 5, 10 or 15 link placements inside existing articles
- Every host site at Domain Rating 50+
- Links live for a minimum of 12 months
- Live URL report in a shared sheet

WHAT THIS DOES

Delivers genuine authority to the pages you choose, from vetted high-authority sites in a relevant vertical. Half the placements carry standard followed links - a mixed profile, which is what a natural link profile looks like.

HOW SITE SELECTION WORKS

Send us the page you want to promote. We come back with a proposed site list for your approval. You choose the anchor text and the destination URL - and if anything needs to change once we are live with a publisher, we come back to you before it does. List of sites available here.

WHAT THIS DOESN'T DO

Slower and pricier per unit than everything else here, because it is the only package doing this particular job. Buy it for rankings, not for brand visibility.
